

Physics 202-01: College Physics 2 (Fall 2018, CRN 80392)

Instructor: Dr. P. W. Mengyan **Office:** West Science 2513 **Phone:** 906.227.2183

Email: pmengyan@nmu.edu [preferred comm. method]. Begin subject line with "PH 202-01:"

Office Hours: {M,W}: 10–10:55 ; R: 10-11:55 in *WS 2513*. Other times by appointment

Class Meetings {M,T,W,R} 09:00 to 09:50 in *John X Jamrich 1318*

Webpage: <https://www.webassign.net> [class key: *NMU 3580 1914*]

Required for HW Self-enroll with class key. Instructions available at

http://webassign.net/manual/Student_Quick_Start_Guide_SE.pdf

For 'Name', 'Student ID Num' and 'Email', see homework section for instructions

Suggested Texts: - OpenStax College, *College Physics*. *OpenStax College*. 21 June 2012.

ISBN: 1938168003. Download for *free* at <http://cnx.org/content/col11406/latest/>

- Giancoli, *Physics Principles with Applications* in the 4th, 5th or 6th edition. These older editions can be purchased for *less* than \$25 and is an *excellent* textbook.

For Lab - The Physics department will provide documentation for each lab.

Course Description (outline and expected outcomes): This algebra based introductory Physics course will cover the basics of electricity, magnetism, circuits, optics, encourage critical thinking and general problem solving skills. A student who is successful in this class will, for each topic, be able to (i) explain the fundamental principles to a peer and (ii) apply a general problem solving strategy to interpret and write a solution to basic questions. Progress towards these outcomes will be assessed through in-class exams, homework assignments, quizzes, laboratory and discussion exercises. More information is available via the teaching section of the instructor's webpage.

General Education Requirements: PH 202 satisfies the Laboratory Science University Requirement (LAB) and part of the Scientific Inquiry (SCII) requirements. SCII relates to the ability to use of the scientific process to investigate and report knowledge about natural or social phenomena.

Liberal Studies Requirement (*applicable to pre-2017 bulletin*): PH 201 satisfies part of the Division III: Foundations of Natural Sciences-Mathematics liberal studies requirement. Students who complete the science courses should be able to recognize and understand the scientific method; understand and use scientific concepts; understand and discuss general scientific articles; and apply their knowledge of science to everyday experience. Students who complete the mathematics courses should be able to demonstrate a basic understanding of mathematical logic; use mathematics to solve scientific or mathematical problems in college classes; express relationships in the symbolic language of mathematics; and appreciate the role of mathematics in analyzing natural phenomena.

Homework: Assigned periodically via www.webassign.net (*) and may include suggested questions, readings and other activities to supplement lecture. Due date, time and assignment description will be indicated on each assignment. Late assignments are *not* typically accepted. The homework will take time and effort to work and may be difficult. Do yourself a favor, start the homework as soon as it is available, and allow plenty of time to work through each question. Be warned that some questions may go quickly and others may take a significant amount of time.

*NOTE: To get started, see http://webassign.net/manual/Student_Quick_Start_Guide_SE.pdf and use

- **Class Key:** ** See top of page **
- **Name:** Full legal name as on record with NMU (so I know who you are)
- **Email Address:** Your official @nmu.edu email is required to be used for all university business
- **ID Number:** MUST be your *complete* NMU IN with leading zeros. This is the *only* way to uniquely identify students; without it you will NOT receive any credit for work completed via webassign. No exceptions.

Quizzes: May be administered during the regularly scheduled class time and may include content from lecture, homework, exams, labs or any other relevant course related information. Please note that quizzes may or may not be announced during lecture and will *never* be announced via email. **Make up quizzes will not be administered.** These will be designed with a few goals in mind (1) provide students the opportunity to check their understanding of relevant material and receive feedback from the instructor (2) provide the instructor with feedback as to how well students are understanding the material (3) encourage students to continue to stay on top of the material, develop sound study habits, regularly attend class, etc

Exams: There will be three (3) scheduled exams during the semester plus a final exam. Each in-class exam is equally weighted. If the final exam score is higher than the lowest in-class exam score, the final exam score will replace this lowest in-class exam score. Exams 1, 2 and 3 will be administered in the normal lecture room and during the normal meeting time. The final exam will be administered in the same room as lecture and at a time pre-determined by NMU. **Make up exams will not be administered.** If an exam is to be missed due to extenuating circumstances, contact me via email BEFORE the scheduled exam time to see about making the appropriate arrangements. Use of notes, books or electronic gizmos of any sort will not be permitted on the exams unless otherwise specified by the instructor.

TENTATIVE Exam Schedule:**

Exam 1:	Normal class time	Thu	~20 Sep 2018	CH 18–21** [<i>#’s w.r.t. OpenStax</i>]
Exam 2:	Normal class time	Thu	~18 Oct 2018	CH 22–24** [<i>#’s w.r.t. OpenStax</i>]
Exam 3:	Normal class time	Thu	~15 Nov 2018	CH 25–27** [<i>#’s w.r.t. OpenStax</i>]
Final Exam	08:00 to 09:50	Tue	11 Dec 2018	All material covered in class

**Exam *times* and *content* will be adjusted appropriately to accommodate the course schedule.

Deviations from this tentative schedule will be discussed, *in class*, as they become relevant. Exam dates will typically be finalized a minimum of one week before the exam is administered.

The final exam time is predetermined by NMU and will *not* be modified by the instructor.

Grades:

Lab***, Quizzes, Homework, etc:	30%	A: ≥ 90%; B: ≥ 80%	
Exams (1, 2, 3, Final, Final; Best 4 of 5):	70%		C: ≥ 70%; D: ≥ 60%
<u>Total:</u>	<u>100%</u>		F: < 60%

'+' and '-' grades are typically assigned when a grade is within ± ~2.0% of the letter grade cutoff.

***Minimum grade of 60% in the laboratory component, in addition to appropriate performance in the rest of the course, is *required* to earn an overall passing grade in this course.

Lab:

Lab is a separate course in which you must be enrolled. A minimum score of 60% is *required* in order to qualify for a passing score in the lecture. To be clear, that means if your score is any less than 60.0%, you will have earned a FAILING grade in your lecture section. The final grade from the laboratory course part of your lecture score and likely to be weighted at ~15%. The laboratory section of this course is designed to provide hands on experience with the topics covered in lecture.

Important Notes:

- **ADA Statement:**
In compliance with the ADA and university policy
“If you have a need for disability-related accommodations or services, please inform the Coordinator of Disability Services in the Dean of Students Office at 2101 C. B. Hedgcock Building (227-1700 or disserv@nmu.edu). Reasonable and effective accommodations and services will be provided to students if requests are made in a timely manner, with appropriate documentation, in accordance with federal, state, and University guidelines.”
- **Religious Holidays:**
Pursuant to university policy, a student who intends to observe a religious holy day should make that intention known, in writing, to the instructor prior to an absence. A student who is absent from a class, exam or exercise for the observance of a religious holy day shall be allowed to complete an assignment or exam scheduled for that day within a reasonable time around that absence.
- **Academic Integrity:**
Section 2.3.1 of the NMU Student Handbook discusses scholastic dishonesty; all of which will be upheld in all aspects of this course. Academic dishonesty will not be tolerated.
- **Appropriate behavior:**
I expect students to behave in a respectful, considerate and courteous fashion in any activity related to this course (e.g. Lecture, lab, discussion, office hours etc).
Rude, disrespectful or disruptive behavior will *never* be tolerated.

Final Notes and Suggestions to Succeed:

- **Course Assistance:** A plethora of options are available to support your success in this course (e.g. Lecture [Dr. Mengyan], lab and discussion via class, office hours, email or special appointment), your textbook, the library, other text books and physics department tutors. Take advantage of the available resources. **DO NOT HESTITATE TO ASK QUESTIONS AS THEY ARISE!**
- Preparation is the key!
 - o Read your book material before AND after we cover it in class
 - o Take good notes during lecture
 - o Study your notes
 - o Take advantage of available resources (e.g. *actually* attend class, read the book)
 - o If something is unclear during lecture or your own studying, **ASK ABOUT IT!**
- Homework and supplemental work:
 - o Work each question using the problem solving process. Getting the ‘correct’ numerical answer is *meaningless* if you do not understand the process used to arrive there.
 - o Start your homework assignments as early as possible
 - o Read the homework questions when they are available before the related material is presented in class; familiarity with the questions will help you associate the relevant concepts as they are introduced in lecture, lab and while you read the material
 - o Give yourself plenty of time to complete the assignments as you will likely need to think carefully about the questions, review the relevant sections of the text or your notes and then work towards a solution
 - o Use a dedicated notebook to *fully* work out homework and supplemental questions
- Studying for any exam should be an ongoing exercise. Structured reviews of material built into your schedule promotes better long-term retention and higher understanding of the material
- I cannot stress enough: **ASK QUESTIONS WHEN YOU HAVE THEM!**

TENTATIVE Schedule of Course Content:

<u>Week</u>	<u>Start Date</u>	<u>Chapter[s] (Open Stax)</u>	<u>Content / Additional Detail</u>
1	27 Aug 18	18, 19	Electric Charge, E-Field, Potential; Capacitors
2	03 Sep 18	18, 19, 20	E-field, potential; Capacitors; Electric Current
3	10 Sep 18	20, 21	Electric Current, Resistance, Ohm's Law, Applications Circuits, DC Instruments
4	17 Sep 18	20,21	Circuits, Applications Exam 1 (Ch 18-21: ~20 Sep 2018)
5	24 Sep 18	22	Review E1; Magnetism, B-Fields, Hall Effect
6	01 Oct 18	22,23	Magnetism, Forces, Application, EM induction
7	08 Oct 18	22, 23	Forces, Application, EM Induction, AC Circuits
8	15 Oct 18	23,24	AC Circuits, EM Waves, Applications Exam 2 (Ch 21-24: ~18 Oct 2018)
9	22 Oct 18	24-25	Geometric Optics
10	29 Oct 18	25-26	Optics (Geometric, Vision, Applications)
11	05 Nov 18	26-27	Wave Optics
12	12 Nov 18	Special Topics	Exam 3 (Ch 25-27: 15 Nov 2018)
13	19 Nov 18	19-23 Nov 2018	**NO CLASS**
14	26 Nov 18	Special Topics	Selected topics from text
15	03 Dec 18	Special Topics	Selected topics from text
	11 Dec 18	FINAL EXAM: 08:00 to 09:50 on Tues 11 Dec 2018 in JXJ 1318	

Notable Dates:

27 Aug 2018: First official day of class

03 Sep 2018: Labor Day (No Class)

04 Nov 2018: Daylight Savings Time Ends ('Fall' back)

19 Nov 2018: Thanksgiving Recess (No Class)

20 Nov 2018: Thanksgiving Recess (No Class)

21 Nov 2018: Thanksgiving Recess (No Class)

22 Nov 2018: Thanksgiving Recess (No Class)

08 Dec 2018: Last day of regular scheduled class

11 Dec 2018: Final Exam (08:00 to 09:50)
