**Physics 202-01: College Physics 2 (Summer 2017)**

**Instructor:** Dr. P. W. Mengyan  
**Office:** West Science 2513  
**Phone:** 906.227.2183

**Email:** pmengyan@nmu.edu [preferred comm. method]. Begin subject line with “PH 202-01.”

**Office Hours:**  
{M,T,W,R} 15:30 to 16:30 in West Science 2513. Other times by appointment.

**Class Meetings:**  
PH 202-01 [CRN: 50594]:  
{M,T,W,R} 09:50 to 12:00 in John X Jamrich 1319

**Webpage:** [https://www.webassign.net](https://www.webassign.net) [class key: nmu 3835 2705]  
Self-enroll with class key. Instructions available at [http://www.webassign.net/manual/WA_Student_Quick_Start.pdf](http://www.webassign.net/manual/WA_Student_Quick_Start.pdf)  
For ‘Name’, ‘Student ID Num’ and ‘Email’, see homework section for instructions.

**Suggested Text:**  
For lecture: OpenStax College, College Physics. OpenStax College. 21 June 2012.  

**Suggested Text:**  
For lecture: Giancoli, Physics Principles with Applications in the 4th, 5th or 6th edition. These older editions can be purchased for less than $15 and is an excellent textbook.

**Required Text:**  
There is no required textbook for lab.

**Course Description** (outline and expected outcomes):  
This algebra based introductory Physics course will cover the basics of electricity, magnetism, circuits, optics, encourage critical thinking and general problem solving skills. Progress towards these outcomes will be assessed through in-class exams, homework assignments, quizzes, laboratory and discussion exercises.  
More information is available via the teaching section of the instructor’s webpage.

**General Education Requirements:**  
PH 202 satisfies the Laboratory Science University Requirement (LAB) and part of the Scientific Inquiry (SCII) requirements. SCII relates to the ability to use of the scientific process to investigate and report knowledge about natural or social phenomena.

**Liberal Studies Requirement** (applicable to pre-2017 bulletin):  
PH 201 satisfies part of the Division III: Foundations of Natural Sciences-Mathematics liberal studies requirement. Students who complete the science courses should be able to recognize and understand the scientific method; understand and use scientific concepts; understand and discuss general scientific articles; and apply their knowledge of science to everyday experience. Students who complete the mathematics courses should be able to demonstrate a basic understanding of mathematical logic; use mathematics to solve scientific or mathematical problems in college classes; express relationships in the symbolic language of mathematics; and appreciate the role of mathematics in analyzing natural phenomena.

**Homework:**  
Assigned periodically via [www.webassign.net](http://www.webassign.net) (*) and may include suggested questions, readings and other activities to supplement lecture. Due date, time and assignment description will be indicated on each assignment. Late assignments are not typically accepted.  
The homework will take time and effort to work and may be difficult. Do yourself a favor, start the homework as soon as it is available, and allow plenty of time to work through each question. Be warned that some questions may go quickly and others may take a significant amount of time.  
*NOTE: To get started, see [http://webassign.net/manual/Student_Quick_Start_Guide_SE.pdf](http://webassign.net/manual/Student_Quick_Start_Guide_SE.pdf) and use  
- **Class Key:** **See top of page**  
- **Name:** Full legal name as on record with NMU (so I know who you are)  
- **Email Address:** Your official @nmu.edu email is required to be used for all university business  
- **Student ID Number:** MUST be your complete NMU IN with all leading zeros  
  This is the only way I can uniquely identify students; without it you will NOT receive any credit for work completed via webassign. No exceptions.
Quizzes: Will be administered during the regularly scheduled class time and may include content from lecture, homework, exams, labs or any other relevant course related information. Please note that quizzes may or may not be announced during lecture and will never be announced via email. **Make up quizzes will not be administered.** These will be designed with a few goals in mind (1) provide students the opportunity to check their understanding of relevant material and receive feedback from the instructor (2) provide the instructor with feedback as to how well students are understanding the material (3) encourage students to continue to stay on top of the material, develop sound study habits, regularly attend class, etc

Exams: There will be two (2) exams: one midterm and a final. All exams are administered in the normal lecture room and running the normal meeting time. **Make up exams will not be administered.** If an exam is to be missed due to extenuating circumstances, contact me via email BEFORE the scheduled exam time to see about making the appropriate arrangements. Use of notes, books or electronic gizmos of any sort will not be permitted on the exams unless otherwise specified by the instructor.

**TENTATIVE** Exam Schedule:

| Exam 1: | Normal class time | Thu 20 Jul 2017 | CH 18–21** [#’s w.r.t. OpenStax] |
| Exam 2: | Normal class time | Thu 10 Aug 2017 | CH 21–27** [#’s w.r.t. OpenStax] |

**Exam times and content will be adjusted appropriately to accommodate the course schedule.**

Deviations from this tentative schedule will be discussed, *in class*, as they become relevant. Exam dates will typically be finalized a minimum of one week before the exam is administered.

The final exam time is predetermined by NMU and will not be modified by the instructor.

Grades:

| Lab***, Quizzes, Homework, etc: 35% | A: ≥ 90%; B: ≥ 80% |
| Exams: 65% | C: ≥ 70%; D: ≥ 60% |
| **Total: 100%** | F: < 60% |

‘+’ and ‘−’ grades are typically assigned when a grade is within ± ~2.0% of the letter grade cutoff.

***Minimum grade of 60% in the laboratory component, in addition to appropriate performance in the rest of the course, is **required** to earn an overall passing grade in this course.

Lab:

Lab is a separate course (PH 202) in which you must be enrolled. A minimum score of 60% is **required** in order to qualify for a passing score in the lecture. To be clear, that means if your score is any less than 60.0%, you will have earned a FAILING grade in your lecture section. The final grade from the laboratory course part of your lecture score and likely to be weighted at ~20%. The laboratory section of this course is designed to provide hands on experience with the topics covered in lecture.

Important Notes:

- **ADA Statement:**
  In compliance with the ADA and university policy
  “If you have a need for disability-related accommodations or services, please inform the Coordinator of Disability Services in the Dean of Students Office at 2101 C. B. Hedgcock Building (227-1700 or disserv@nmu.edu). Reasonable and effective accommodations and services will be provided to students if requests are made in a timely manner, with appropriate documentation, in accordance with federal, state, and University guidelines.”

- **Religious Holidays:**
  Pursuant to university policy, a student who intends to observe a religious holy day should make
that intention known, in writing, to the instructor prior to an absence. A student who is absent from a class, exam or exercise for the observance of a religious holy day shall be allowed to complete an assignment or exam scheduled for that day within a reasonable time around that absence.

- **Academic Integrity:**
  Section 2.3.1 of the NMU Student Handbook discusses scholastic dishonesty; all of which will be upheld in all aspects of this course. Academic dishonesty will not be tolerated.

- **Appropriate behavior:**
  I expect students to behave in a respectful, considerate and courteous fashion in any activity related to this course (e.g. Lecture, lab, discussion, office hours etc). Rude, disrespectful or disruptive behavior will never be tolerated.

**Final Notes and Suggestions to Succeed:**

- **Course Assistance:** A plethora of options are available to support your success in this course (e.g. Lecture [Dr. Mengyan], lab and discussion via class, office hours, email or special appointment), your textbook, the library, other text books and physics department tutors. Take advantage of the available resources. DO NOT HESITATE TO ASK QUESTIONS AS THEY ARISE!

- **Preparation is the key!**
  - Read your book material before AND after we cover it in class
  - Take good notes during lecture
  - Study your notes
  - Take advantage of available resources (e.g. actually attend class, read the book)
  - If something is unclear during lecture or your own studying, ASK ABOUT IT!

- **Homework and supplemental work:**
  - Start your homework assignments as early as possible
  - Read the homework questions when they are available before the related material is presented in class; familiarity with the questions will help you associate the relevant concepts as they are introduced in lecture, lab and while you read the material
  - Give yourself plenty of time to complete the assignments as you will likely need to think carefully about the questions, review the relevant sections of the text or your notes and then work towards a solution
  - Use a dedicated notebook to **fully** work out homework and supplemental questions

- **Studying for any exam should be an ongoing exercise. Structured reviews of material built into your schedule promotes better long-term retention and higher understanding of the material**

- **I cannot stress enough:** ASK QUESTIONS WHEN YOU HAVE THEM!
## TENTATIVE Schedule of Course Content:

<table>
<thead>
<tr>
<th>Week</th>
<th>Start Date</th>
<th>Chapter[s] (Open Stax)</th>
<th>Content / Additional Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>5 Jul 17</td>
<td>18, 19</td>
<td>Electric Charge, E-Field, Potential; Capacitors</td>
</tr>
<tr>
<td>2</td>
<td>10 Jul 17</td>
<td>20, 21</td>
<td>Electric Current, Resistance, Ohm’s Law, Circuits, DC Instruments</td>
</tr>
<tr>
<td>3</td>
<td>17 Jul 17</td>
<td>21, 22</td>
<td>Circuits, Magnetism, B-Fields, Hall Effect, Exam 1</td>
</tr>
<tr>
